Transport & Rig Move Division

# About Black Saber

Transport & Rig Move Division

The **Black Saber Industries Transport & Rig Move Division** moves, lifts and operates the equipment the energy industry depends on — onshore rig moves, camp and site relocations, heavy haulage, equipment rental, plant and refinery logistics, and the certified manpower and operators behind every job. We are one division of the wider Black Saber group, which also delivers civil, MEP and technology works through a separate division.

Every job is planned by our own engineering and QA/QC teams, executed by Aramco- and TÜV-certified riggers and operators, and supported from our 100,000 m<sup>2</sup> integrated yard in the Dammam region — workshops, logistics yard, warehousing and a dedicated Technology & Control Centre under one roof.

Aligned with the Kingdom's In-Kingdom Total Value Add (iKTVA) programme, we invest in Saudi manpower, local supply chain and national capability — while drawing on a wider group presence across Doha, Dubai, China and India for international sourcing, manufacturing and engineering depth.

## Our Vision

To be the Kingdom's premier single-source partner for rig moving, heavy haulage and industrial logistics — recognised for safety, precision and the intelligent use of technology across every mobilisation.

## Our Mission

To move and operate what the energy industry depends on with unmatched safety, speed and cost efficiency — integrating AI-enabled fleet technology with certified crews, robust equipment and a 100,000 m<sup>2</sup> operational base to deliver dependable results, in full alignment with the Kingdom's industrial localisation goals.

## OUR VALUES

## TRUSTED

The principles that guide everything we do.

T

**Transparency**

Open and honest dealings with clients, partners, and authorities at every stage.

U

**Unity**

One accountable team across all disciplines, working in close partnership with our clients.

T

**Technology**

We apply innovation and intelligence across everything we engineer and build.

D

**Dedication**

Committed to our clients' success, from design through to long-term operation.

R

**Reliability**

We deliver on our commitments, on schedule and to specification.

S

**Safety**

The protection of people, assets, and the environment takes precedence in all we do.

E

**Excellence**

Quality delivered to code and to standard, consistently.

## US IN NUMBERS

20+

YEARS GROUP EXPERIENCE

10+

SERVICE DOMAINS

6+

GLOBAL PRESENCE

360°

INTEGRATED DELIVERY

A tall, illuminated oil rig stands against a dark night sky. The rig's structure is complex, with various levels and platforms visible. Bright lights illuminate the rig, creating a stark contrast with the surrounding darkness. The rig is positioned in the center-left of the frame, with its base extending towards the bottom left. The overall scene conveys a sense of industrial scale and nighttime operations.

SERVICE 01

## Onshore Rig Move

Black Saber Industries delivers complete onshore rig mobilisation and demobilisation — planned, engineered and executed as a single accountable service. Every move begins with a detailed route and site survey, followed by a documented rig-down, transport and rig-up sequence carried out under strict QHSE supervision.

Our rig move teams are led by dedicated safety officers and staffed with Aramco-certified riggers, working to the load charts, lifting plans and permit requirements each operator demands — with daily progress reporting so operators always know where their rig stands.

### SCOPE INCLUDES

- Road & route surveys
- Rig-down / rig-up sequencing
- Rig mast & derrick raising
- Daily progress reporting

### DELIVERED BY

- Aramco-certified rigging crews
- Dedicated site safety officers
- Permit & escort coordination
- Dammam Technology & Control Centre

### BUILT ON CERTIFIED PROCESS

Every rig move we run sits inside an ISO 9001, 14001 and 45001 certified management system, planned and tracked through our Dammam Technology & Control Centre — so operators get a documented, auditable record of every stage, not just a completed job.

SERVICE 02

## Camp & Site Moves

Black Saber Industries relocates full camps and project sites — not just the rig. Every move applies the same planning discipline as a rig move: a detailed site survey, a sequenced relocation plan, and coordinated execution across accommodation units, site infrastructure and support services.

From a single camp relocation to a full site move, our teams handle the logistics that keep a project running through the transition — coordinated transport, sequencing and on-site reassembly, all under the same QHSE supervision as every other job we run.

### SCOPE INCLUDES

---

- Camp relocations
- Full site moves
- Site infrastructure logistics
- Sequenced relocation planning

### DELIVERED BY

---

- Dedicated site logistics teams
- Experienced HD drivers
- Permit & escort coordination
- Dammam Technology & Control Centre

---

### ONE ACCOUNTABLE TEAM

A camp or site move touches every part of the division — logistics, drivers, safety officers and our Control Centre — coordinated as one job, not a string of subcontracted trips, and backed by the same QHSE management system that governs every rig move we run.

SERVICE 03

# Heavy Haulage

Black Saber Industries moves the oversized, overweight loads that standard transport can't — rig components, skids, modules and heavy machinery — across the Kingdom's roads and desert terrain. Every haulage job starts with a route survey and transport plan.

Our haulage fleet includes prime movers and low-bed / flatbed trailers matched to the load, operated by experienced HD drivers under strict journey-management controls — from single-load, long-distance moves to multi-vehicle rig moves, delivered intact and on schedule.

## SCOPE INCLUDES

- Route & load surveys
- Long-distance moves
- Permit & escort coordination
- Journey management

## DELIVERED BY

- Prime movers & low-bed/flatbed trailers
- Experienced HD drivers
- Journey management & monitoring
- Dammam Technology & Control Centre

## EVERY LOAD, TRACKED

Our haulage fleet operates under the same certified QHSE system as our rig moves, with each journey planned, permitted and monitored from our Dammam Control Centre — giving operators a documented record of the load from yard to site.

SERVICE 04

## Equipment Rental

Black Saber Industries rents a maintained, ready fleet of heavy equipment — with or without certified operators — for rig sites, plant projects and industrial facilities across the Eastern Province. Every unit is inspected and serviced before it leaves our yard.

Our rental fleet covers mobile cranes, prime movers, low-bed trailers, wheel loaders, generators, and water / diesel tankers, on short- or long-term wet-hire contracts. Where operators are required, we supply Aramco- and TÜV-certified crews alongside the equipment.

### FLEET CATEGORIES

---

- Mobile cranes & loaders
- Prime movers & trailers
- Generators & compressors
- Water & diesel tankers

### HOW WE DELIVER IT

---

- Certified operators on request
- Short- and long-term wet hire
- Scheduled inspection & maintenance
- Rapid mobilisation from our yard

---

### A FLEET YOU CAN AUDIT

Every unit in our rental fleet is inspected, serviced and logged before it leaves our 100,000 m<sup>2</sup> Dammam yard — and where we supply the operator too, that crew carries the same Aramco and TÜV certification we require on every job we run ourselves.

## Plant & Refinery

Black Saber Industries supports plant and refinery operations with equipment moves, heavy lifts and the logistics that connect them — delivered to the same safety standard as every rig move we run. From routine equipment transfers to planned turnaround logistics, our crews work inside live industrial sites under strict access, permit and safety protocols.

Our teams coordinate closely with plant HSE and operations personnel, planning every move around the facility's own safety requirements — so equipment gets where it needs to be without disrupting live operations.

### SCOPE INCLUDES

---

- Plant equipment moves
- Refinery logistics support
- Heavy lifts & transfers
- Turnaround logistics

### DELIVERED BY

---

- Aramco- & TÜV-certified crews
- Site-specific safety planning
- Coordination with plant HSE teams
- Dammam Technology & Control Centre

---

### WORKING TO YOUR SITE'S RULES

Working inside a live plant or refinery means working to someone else's safety programme as well as our own — our ISO 45001 certified HSE system is built to integrate with facility-specific access, permit and safety requirements, not override them.

SERVICE 06

## Specialized Manpower

### ARAMCO & TÜV CERTIFIED OPERATORS

Every lift, rig move and haulage job is only as safe as the people running it. Black Saber Industries supplies Aramco-certified Rigger 1 and Rigger 2 crews, TÜV-certified crane and heavy-equipment operators, HD drivers, and skilled and unskilled manpower for plants, rigs, refineries and camp sites.

Manpower supply is managed through a dedicated team within the division, covering recruitment, certification tracking, competency verification and ongoing training.

#### CERTIFIED TRADES

- Aramco-certified Rigger 1 & Rigger 2
- TÜV-certified crane & equipment operators
- HD drivers
- Skilled & unskilled labour

#### HOW WE MANAGE IT

- Certification & competency tracking
- Ongoing training & toolbox talks
- Client-site embedded crews
- Dedicated Manpower Supply team

#### CERTIFICATION YOU CAN VERIFY

Every rigger, operator and driver we supply is tracked against our certification and competency records — Aramco Rigger 1/2, TÜV operator certification, or the equivalent — so a client can verify exactly who is on their site and what they're certified to do.

SERVICE 07

## On-Rig Operation

Black Saber Industries supplies heavy-duty equipment together with the operators who run it — a single accountable unit working inside your rig programme, not a machine handed over at the gate. Our operators are Aramco- and TÜV-certified, trained to work to your programme's pace and safety requirements from day one.

Whether it's a crane on standby through a rig-up sequence or equipment embedded in ongoing rig operations, our crews integrate into your site team while remaining under our own supervision and certification records.

### SCOPE INCLUDES

---

- Heavy-duty equipment operation
- Embedded rig-site crews
- Equipment + operator as one unit
- Ongoing rig-operations support

### DELIVERED BY

---

- Aramco- & TÜV-certified operators
- Dedicated site supervision
- Certification & competency tracking
- Dammam Technology & Control Centre

---

### ONE POINT OF ACCOUNTABILITY

When we supply equipment and the operator together, responsibility for both sits in one place — our own certification records, our own supervision, and our Dammam Control Centre — rather than split between a rental company and a separate manpower supplier.

## OUR BASE

## Facility & Yard

Black Saber operates from a fully integrated industrial facility spanning **100,000 m<sup>2</sup>** in the Dammam region, Eastern Province, Saudi Arabia — combining workshops, a logistics yard, warehousing and a Technology & Control Centre under one roof.

## KEY FEATURES

- **Workshops** — industrial maintenance, fabrication, machining, and assembly of oil & gas equipment and engineered components.
- **Logistics Yard** — dedicated space for equipment storage, mobilisation, rig moves, and heavy vehicle operations.
- **Warehouse** — spare parts, consumables, and critical inventory for Oil & Gas, EPC, and industrial projects.
- **Technology & Control Centre** — AI, automation, and monitoring systems for advanced industrial applications.
- **Office Complex** — management, engineering, and operations teams, ensuring seamless coordination.

Strategically located in the Dammam industrial region, close to major clients, ports, and industrial zones across the Eastern Province — enabling rapid mobilisation and reliable delivery throughout the Kingdom and the wider GCC.

## AI & DIGITAL FLEET TECHNOLOGY

# AI-Enabled Fleet & Facility Intelligence

Black Saber Industries operates an AI- and technology-integrated Control Centre at the heart of our Dammam yard — turning fleet, rig-move and facility data into decisions that keep operations safer and more efficient.

---

### Predictive Fleet Maintenance

Continuous telematics on fuel consumption, tyre pressure, lubrication and powertrain health keep unplanned downtime to a minimum.

---

### Driver & Operator Monitoring

On-board behaviour tracking — seatbelt use, harsh braking, cornering and speed — feeds targeted training and safer performance.

---

### AI Dash-Cams & Incident Detection

Automatic incident detection with footage upload gives real-time oversight of every vehicle on the move.

---

### Route Optimisation & Geofencing

Smarter route selection for rig moves and haulage — balancing distance, safety and site geofencing in real time.

## OUR PEOPLE

# Certified Crews, Every Job

The division's workforce is built around the people who move and operate: Aramco- and TÜV-certified riggers who bring a rig down and stand it back up, HD drivers who deliver a load intact, dispatchers who coordinate every job from our Control Centre, safety officers who protect every operation, and QA/QC specialists who verify every stage.

From our Dammam yard to rig sites, plants and remote camps across the Eastern Province, our crews operate with precision, accountability, and an uncompromising focus on delivering results that exceed expectations.

## OUR CULTURE

**Safety First, Always**

Zero harm is the only acceptable outcome. Our zero-incident commitment shapes every decision, procedure, and action across all operations.

**Integrity in Action**

Accountability, transparency, and ethical conduct define our relationships with clients, partners, and each other. Our word is our bond.

**Operational Excellence**

High standards drive everything — from engineering to execution — delivering technical precision and reliable performance, every time.

**Workmanship**

Excellence is built through skill and precision — professional certification, technical knowledge, and hands-on experience on every project.

## GROUP REACH &amp; JVS

Headquartered in the Dammam region, Black Saber draws on a wider group presence and joint ventures across the Gulf and Asia — OEM manufacturing and haulage-trailer production from China, and AI/automation systems development in India — for international sourcing, manufacturing and engineering depth behind every local delivery.

## OUR EXECUTION

# How We Deliver

01

## Enquiry & Route Survey

Every job begins with a detailed site and route survey — defining scope, assessing conditions, and aligning on the operator's objectives and timeline.

02

## Planning & Permitting

Our team develops the transport, lifting or relocation plan — routes, permits, escorts and lift charts — reviewed for compliance with operator standards.

03

## Procurement & Mobilisation

We source equipment and crews through our own fleet and yard, mobilising resources to site to keep the job moving on schedule.

04

## Service Execution

Skilled crews execute the job under strict QA-QC and HSE supervision — rig-down, haulage, rig-up or on-site operation, to plan.

05

## Verification & Sign-Off

Every stage is inspected and verified before the next begins, confirming safety and readiness at each handover point.

06

## Handover & Support

We complete progress documentation and operational handover — backed by ongoing equipment and manpower support.

## OUR STANDARDS

# How We Work

### QHSE COMMITMENT

Quality, health, safety and environmental responsibility are built into how we plan, execute and deliver every project.

#### Quality

We deliver to specification, to code and to client requirements — verified, not assumed, through documented inspection at every stage.

#### Health & Safety

Workforce and community safety comes first. We work to a zero-incident goal through rigorous risk assessment, training and site supervision.

#### Environment

We minimise environmental impact — managing waste, resources and emissions responsibly, in full regulatory compliance.

### HOW WE DELIVER ON IT

- Aligned with ISO 9001, 14001 & 45001 frameworks
- Documented QHSE system across all operations
- Risk assessment & method statements for every activity
- Continuous monitoring, auditing & improvement

### CODE OF CONDUCT

Our Code of Conduct defines the standards we uphold with clients, partners, employees, authorities and the communities we serve.

#### Integrity & Governance

We deal honestly, honour our commitments, and operate in full legal compliance — zero tolerance for bribery or corruption, and no conflicts of interest.

#### People & Workplace

Every employee is treated with dignity and respect — fair labour practices, equal opportunity, and full compliance with Saudi labour law.

#### HSE & Community

Safety and environmental responsibility are core conditions of how we work. We invest in local capability, Saudi employment and iKTVA.

### REPORTING CONCERNS

Any employee, partner or client can raise a concern directly with the QHSE Manager or Lead Administrator — every report is reviewed and acted on without fear of reprisal.

## OUR STANDARDS

## Independently Certified

Black Saber is certified to internationally recognised management-system standards — independent, audited verification that quality, safety, and environmental responsibility are embedded practice across every project we deliver.

**ISO 9001:2015**  
Quality Management

**ISO 14001:2015**  
Environmental Management

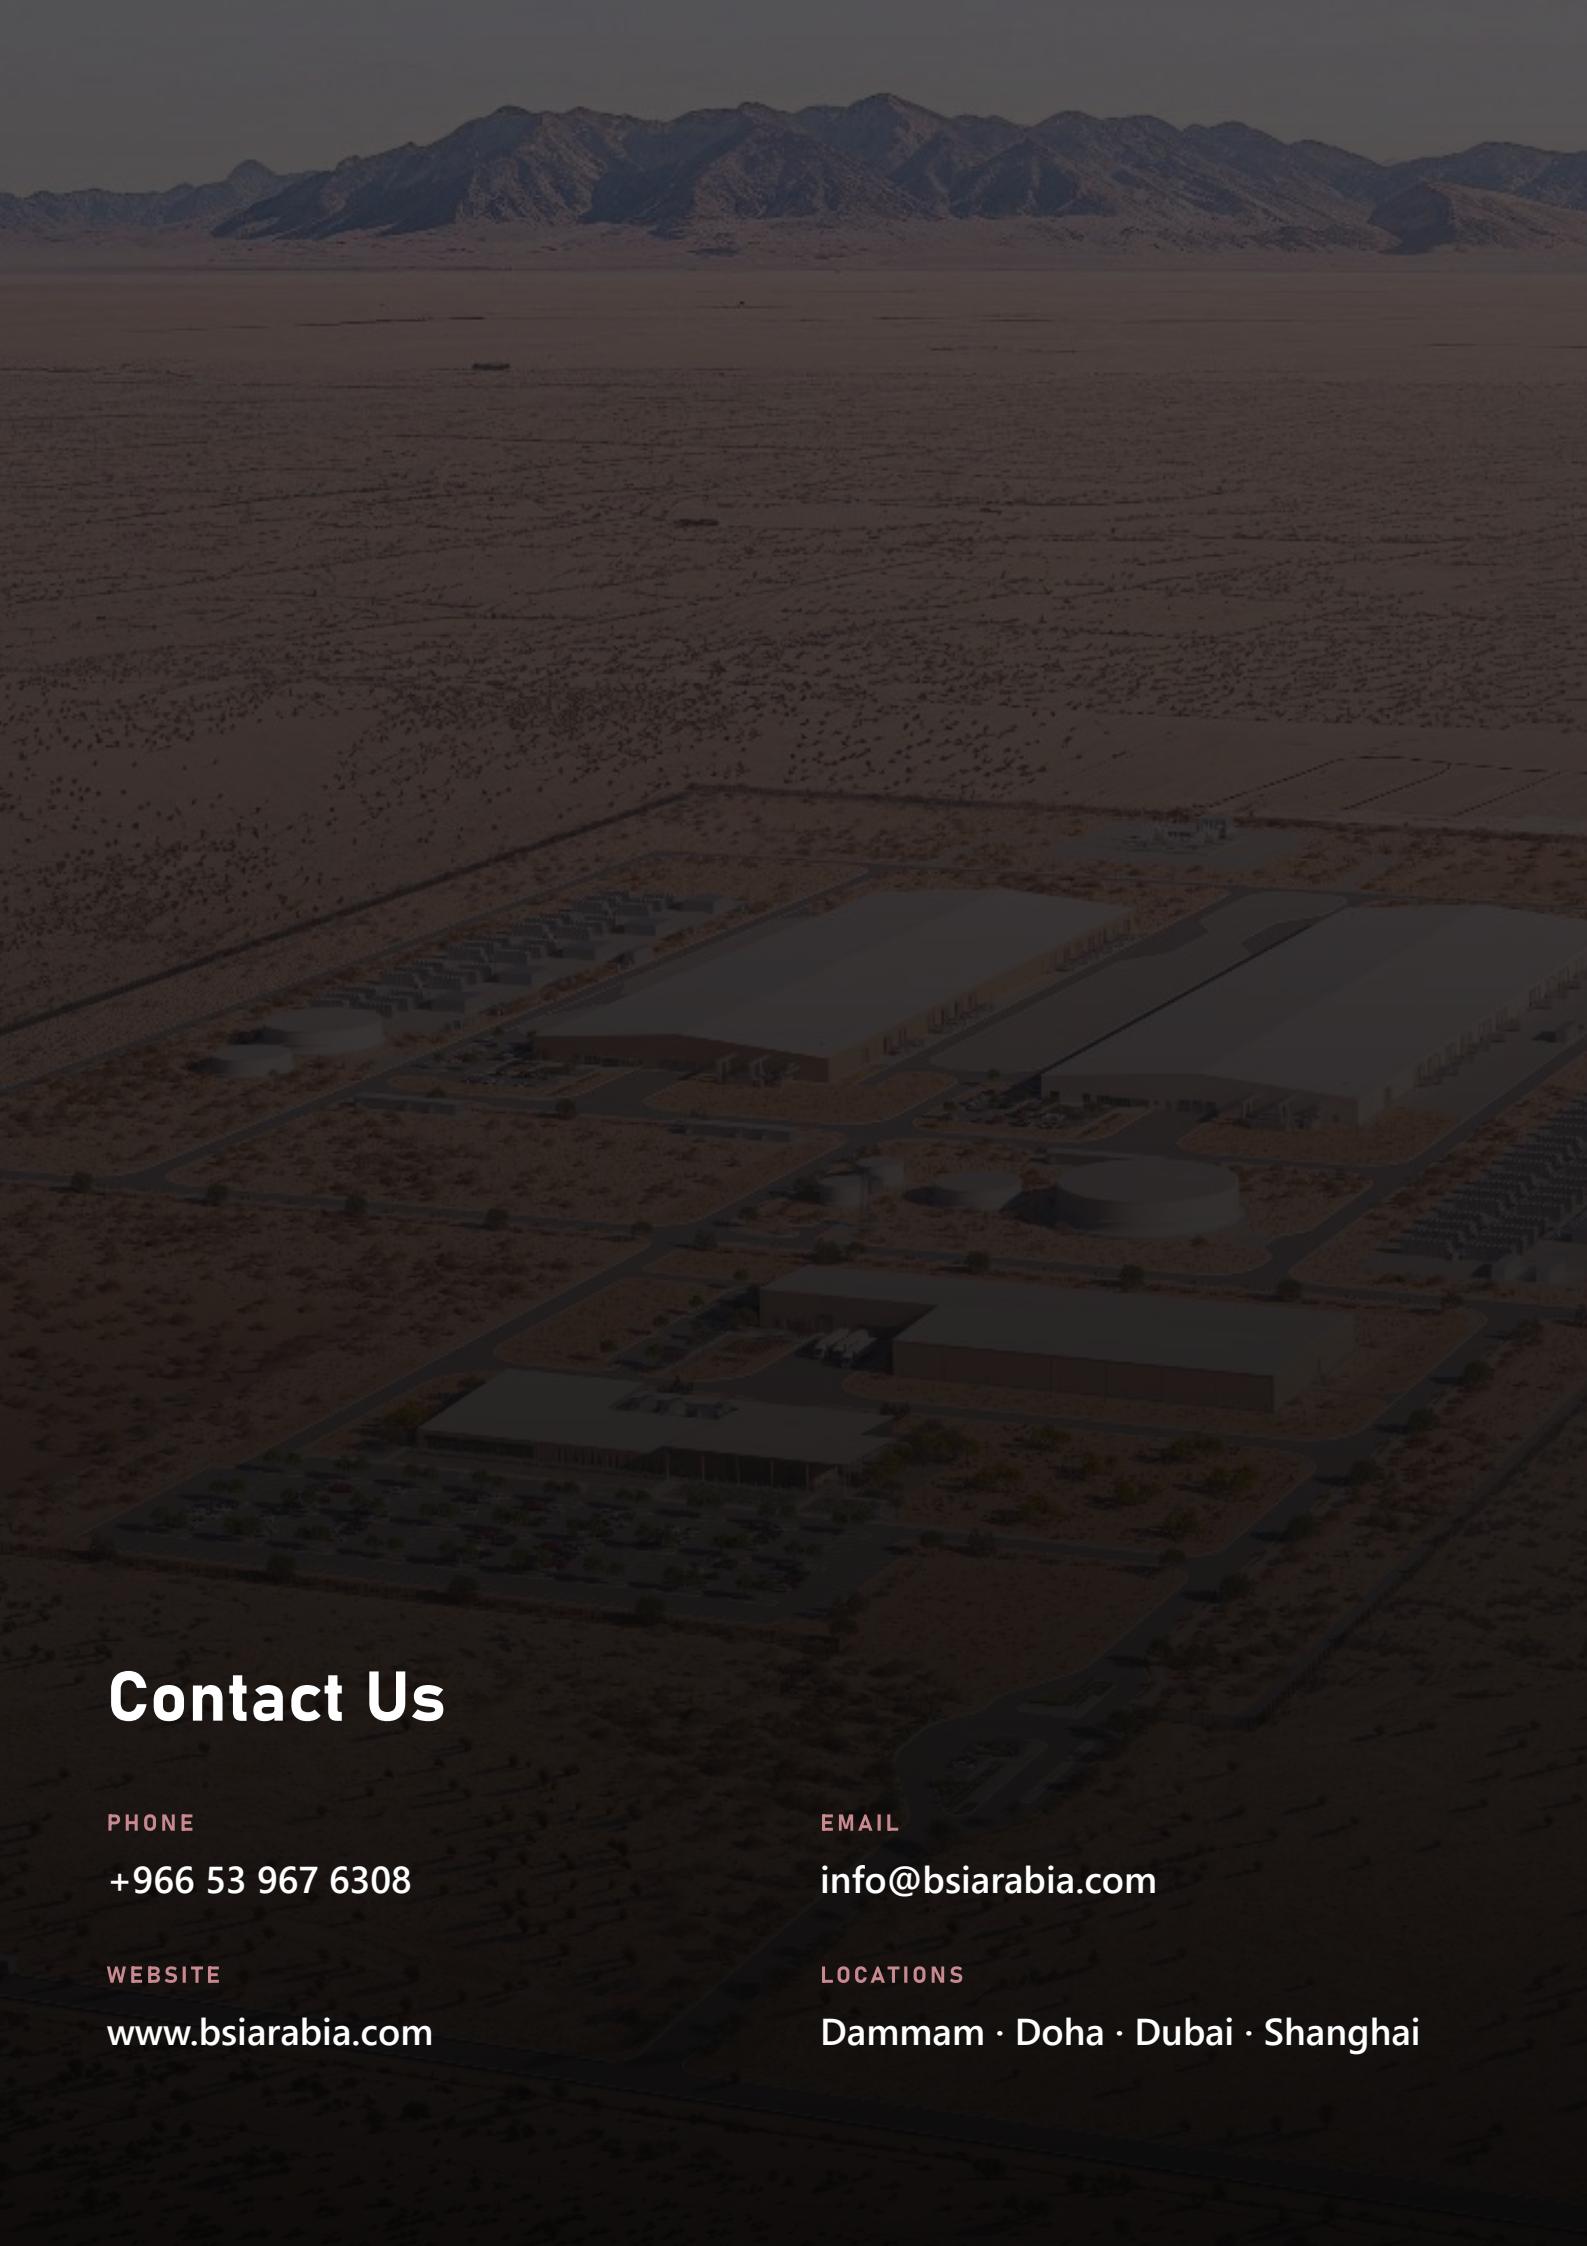

**ISO 45001:2018**  
Occupational Health & Safety

Black Saber Industries is independently certified to ISO 9001, ISO 14001 and ISO 45001 by QRO Certification LLP (Quality Research Organization), accredited by the Egyptian Accreditation Council (EGAC, CAB #011905) and recognised under the IAF Multilateral Recognition Arrangement.
